

Proxa,

The hands-free virtual lab assistant

Protocols.io + Alexa

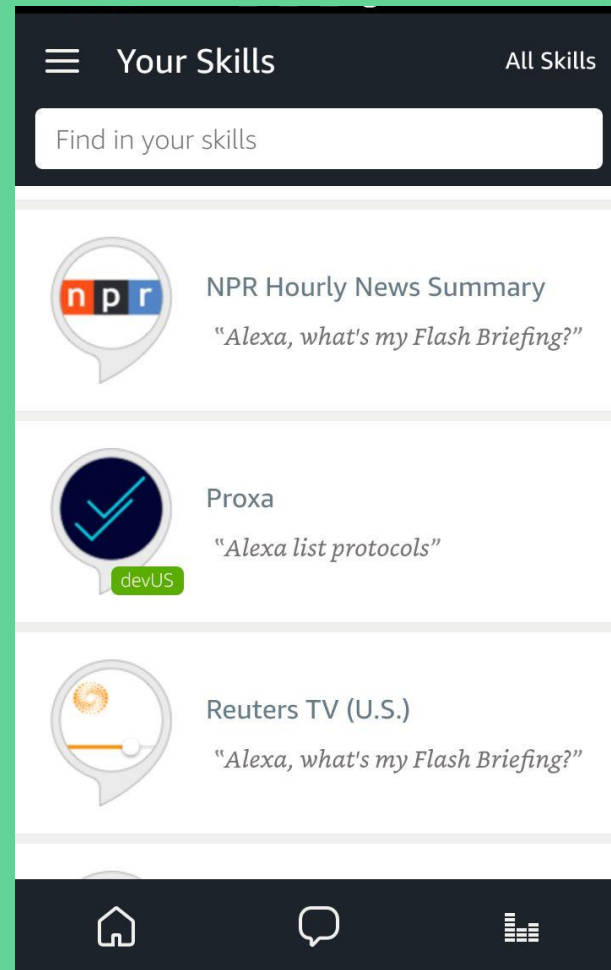

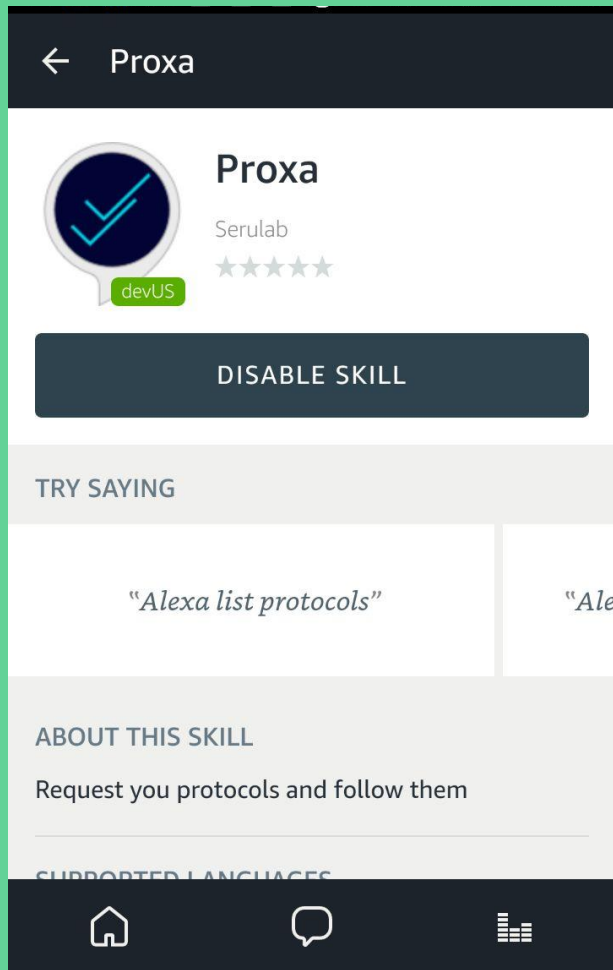

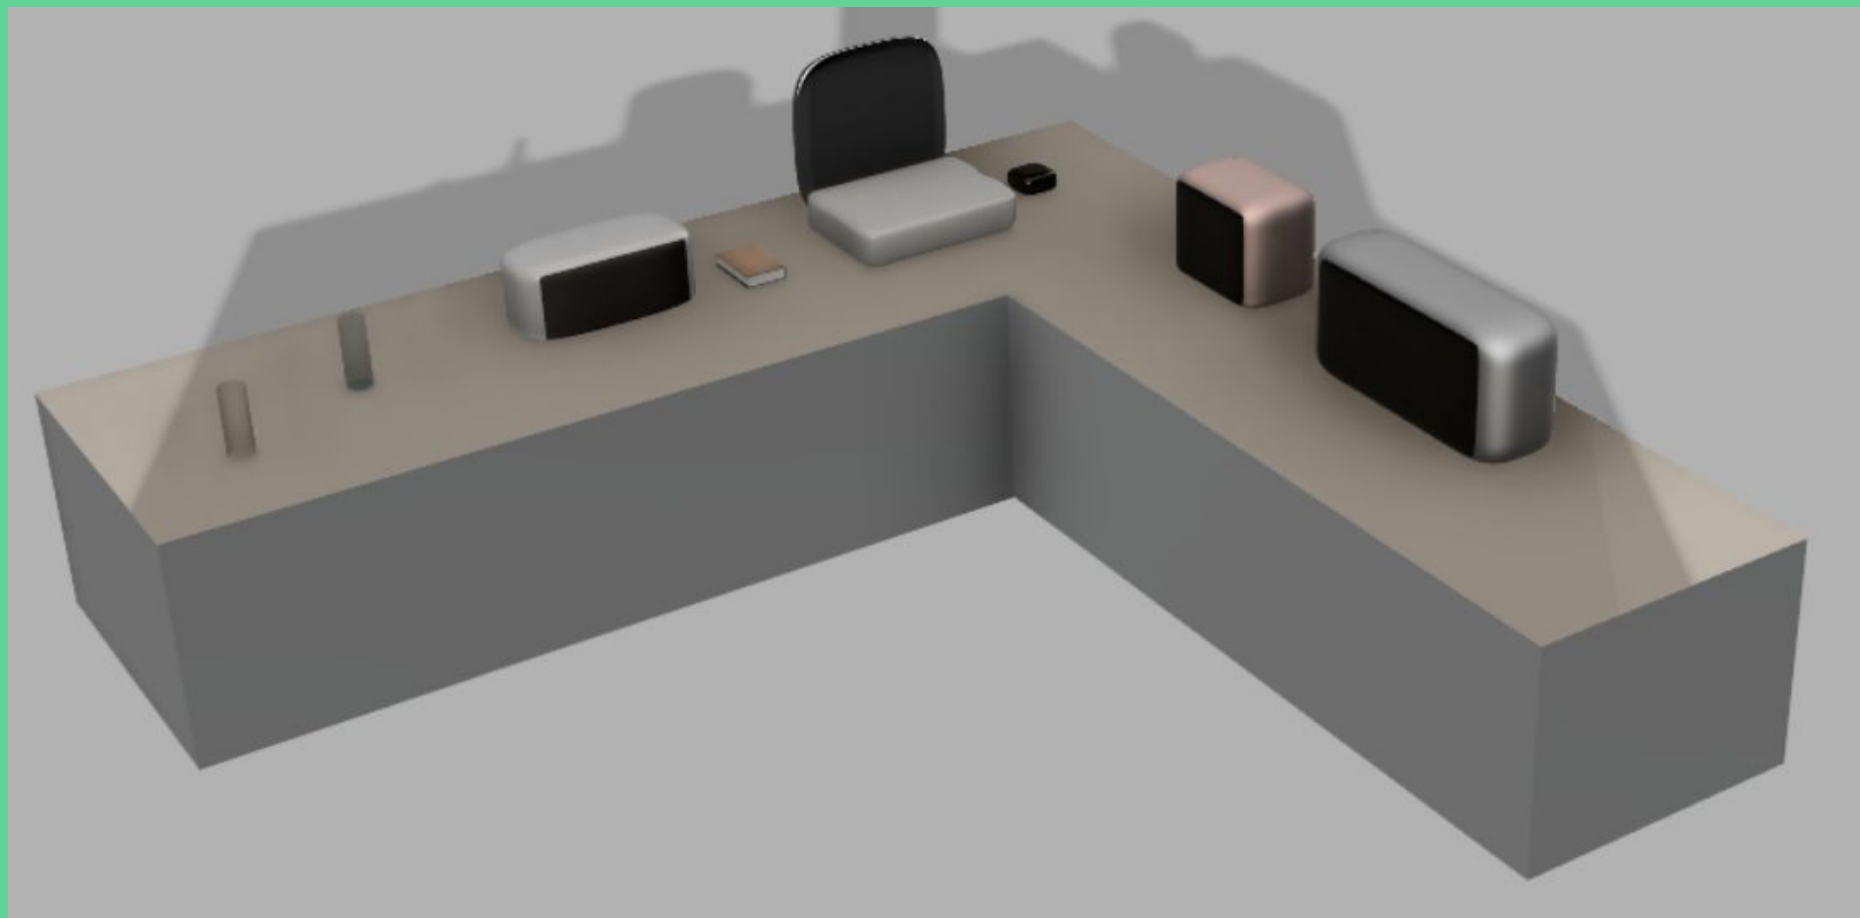

The Problem

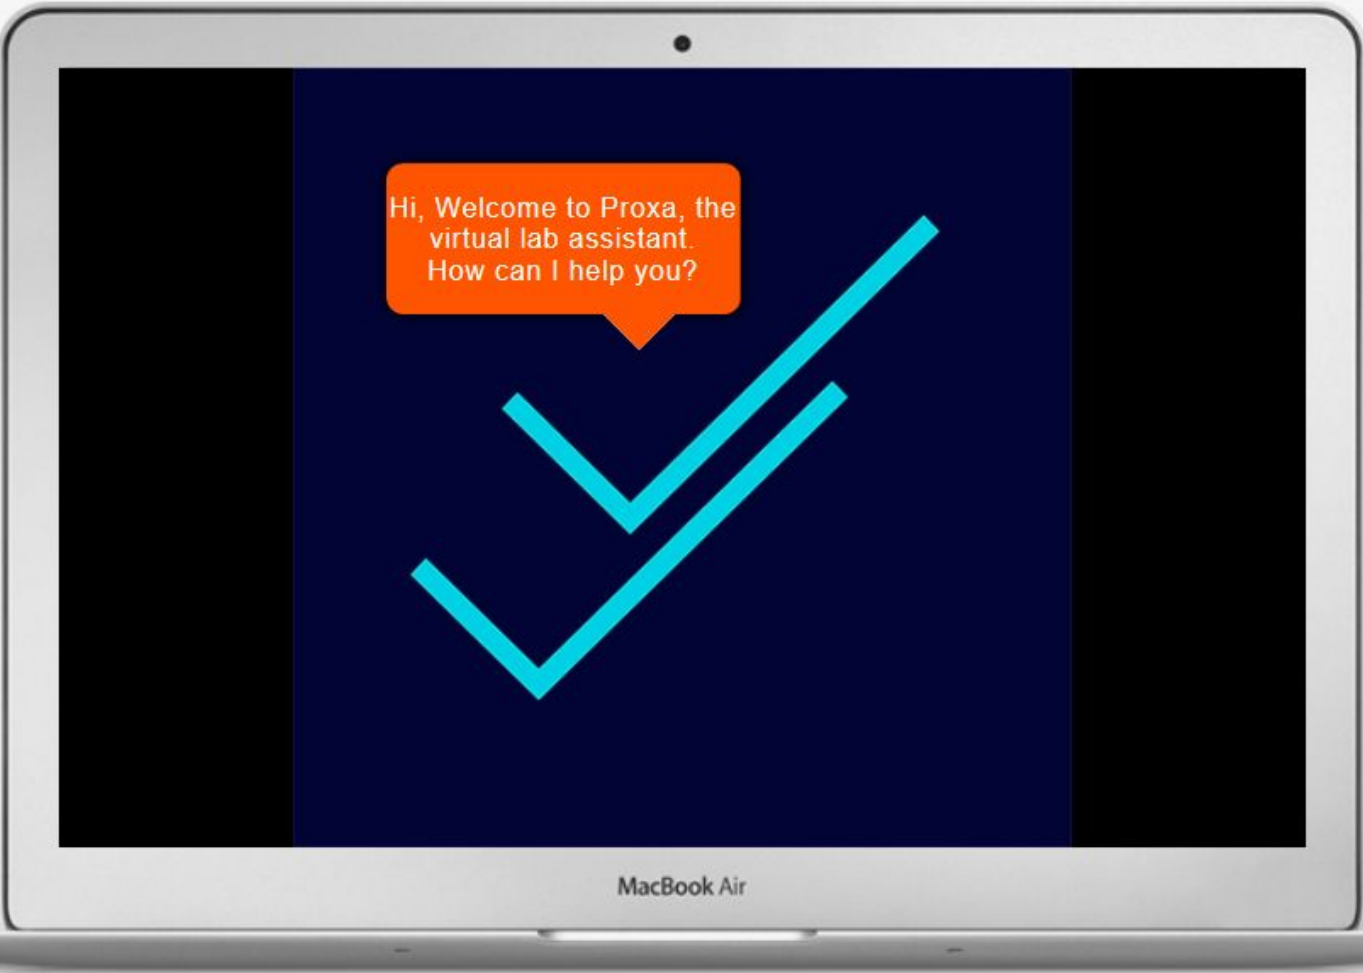

As a scientist, taking off your sweaty gloves that are stained with different kinds of hazardous chemicals once in a while to check the protocols for the experiment on your computer is not a practical working environment

The Hack (PROXA)

Proxa offers that integrated environment with the help of Alexa the virtual personal intelligent assistant that can access all of the protocols, follow up with you step by step, and help you whenever help is needed.

Hi, Welcome to Proxa, the
virtual lab assistant.
How can I help you?

MacBook Air
